The market has been steady the entire week at 9¢@9½¢, but the low markets in the east and the restoration of rates to the Pacific coast will have a tendency to lower the market.

The receipts have been liberal and more than equal to the local demand, the surplus stock having shipped. Spec dealers have expressed a decided expectation of a market before a great while. The butcher market can not be said to contain any new features. The demand for choice grades may be a little stronger, but the market is still weak and cannot compete with any usual. The market has been steady the entire week at 9¢@9½¢, but the low markets in the east and the restoration of rates to the Pacific coast will have a tendency to lower the market.
